VAISHNAVI RAJKUMAR MORE

AI/ML Engineer | Python Developer | B.E. | Pune, Maharashtra
+91 8080881995 | vaishnavimore8080@gmail.com| GitHub | LinkedIn | Leetcode

PROFESSIONAL SUMMARY

AI/ML and Python Developer with a background in Electronics and Telecommunication Engineering. Focused on Machine Learning, Deep Learning, computer vision, and Python-based application development. Worked on AI-based crop disease detection using MobileNetV2 and TensorFlow Lite. Seeking an entry-level AI/ML or Python Developer role to build practical solutions and contribute to real-world projects.

TECHNICAL SKILLS

Programming Languages:	Python, SQL
AI/ML:	Machine Learning, Deep Learing, CNN
Libraries:	NumPy, Pandas, Scikit-learn,OpenCV,TensorFlow
Databases:	MySQL, Supabase
Developer Tools:	Git, GitHub, VS Code, Google Colab, Jupyter Notebook
Core Concepts:	DSA, OOP, Data Preprocessing, Model Training

EDUCATION

B.E. — Electronics and Telecommunication Engineering
Smt. Kashibai Navle College Engineering, Pune | CGPA: **7.84** / 10

HSC (12th) 2020 – 2021
Maharashtra Udayagiri Mahvidyalaya,Udgir, Maharashtra | Percentage: **81%**

SSC (10th) 2018 – 2019
Shyamlal Memorial High School, Udgir, Maharashtra | Percentage: **77.40%**

PROJECTS

Crop Doctor AI— AI-Based Crop Disease Detection
Python, Deep Learning, CNN, MobileNetV2, TensorFlow Lite, Flutter
GitHub: Crop Doctor AI

- Developed an AI-based crop disease detection application to identify tomato leaf diseases from images using deep learning.
- Utilized the MobileNetV2 model for image classification and disease prediction.
- Integrated TensorFlow Lite for lightweight model inference in a mobile application.
- Designed features for disease identification, prevention guidance, detection history, and weather assistance.

Garment Defect Detection— CNN-Based Textile Quality Inspection
Python, CNN, OpenCV, Deep Learning, Image Processing
GitHub: garment defect detection

- Explored a computer vision-based approach to identify garment defects using image processing and deep learning.
- Applied image preprocessing techniques to prepare textile images for defect classification.
- Investigated CNN-based image classification for automated textile quality inspection.
- Focused on reducing manual inspection effort and supporting quality control in the textile industry.

INTERNSHIP / EXPERIENCE

MASS IT Solutions LLP [2nd Jan 2026 –18th Feb 2026]
Python Technologies Intern | Pune, Maharashtra

- Worked on Python technologies and explored Data Science and Machine Learning projects.
- Worked on **Garment Defect Detection in the Textile Industry using CNN**, focusing on automated defect identification in garment images.
- Explored image preprocessing and computer vision techniques using Python and OpenCV for textile quality inspection.
- Strengthened understanding of Python programming, deep learning, image classification, and AI/ML concepts.
